CATALOGUE

FOR THE

ONE HUNDRED AND TWELFTH YEAR

OF

Washington College,

CHESTERTOWN, MARYLAND,

FOR 1893-94.

WASHINGTON COLLEGE, the oldest in the State, was established by Act of Legislature in 1782, as part of the proposed University of Maryland. General Washington, then in camp at Newburg consented that his name should be given to the infant institution, contributed to its endowment, and visited it in 1784. On this occasion the students played before him the Tragedy of Gustavus Vasa, in which reference was made to him as the Gustavus of America. He placed, at this time, his name on the records of the Board of Governors and Visitors, of which he was a member

The College was based on a flourishing Academy with one hundred and forty scholars, under the Rev Dr Smith and his assistants, into which the Free School of Chestertown, established as far back as 1723, had previously been merged. The infant college was organized with all its functions, immediately on the receipt of its charter in 1782. It held its first commencement, with six graduates, in May, 1783, when addresses were delivered in Latin and French.

The original extensive structure, 160 feet in length, whose corner-stone was laid by Governor Paca in 1783, was burned to the ground in 1827. The exercises of the college were continued in Chestertown until 1844, when the central building of the present group was erected upon the old site. The corner-stone was laid by Hon. E. F Chambers. No degrees were conferred from 1827 until 1849, as the institution was at a low ebb, the appropriation from the State having been at times withdrawn or reduced to an inconsiderable amount. It was only by the persistent efforts of the Board of Visitors and Governors that its existence was maintained.

In 1854 two brick buildings were erected, one on each side of the main structure. The College steadily increased in numbers from 1844 until the breaking out of the Civil War

In 1890 two residences, one for the principal, the other for the vice-principal, were erected and all the buildings were put in excellent order. With a faculty of seven professors, the Board of Visitors and Governors give assurance that the College can give a thorough education in the prescribed course of studies.

The College is situated one-half mile north of Chestertown, the county seat of Kent county. The community is noted for its healthy moral tone. Kent has been for years a prohibition county. The buildings are located on a beautiful eminence, from which there is an extended view of the town, Chester river and the rich surrounding country. The past history of the College proves that the position is a healthful one.

Chestertown is in daily communication with Baltimore by means of the Chester River Steamboat Company and connects with the main line of the Delaware Railroad at Clayton, by means of the Baltimore and Delaware Bay Railroad.

Requirements for admission to the Freshman Class :

MATHEMATICS—Arithmetic completed, Algebra to quadratics.

LATIN—The Essentials of Latin Grammar Helvetian War of Cæsar

SCIENCE—Descriptive and Physical Geography Physiology

ENGLISH—English Grammar, Orthography History of the United States History of England, Medieval and Modern History

To accommodate those educated in the public schools, Greek will not be begun until the Freshman year

THE COURSES OF STUDY

The College has two courses of study, the Classical and Scientific, each of which leads to the degree of Bachelor of Arts.

The Classical Course requires Greek throughout the four years.

The Scientific Course substitutes for the four years of Greek, French in the Freshman and Sophomore years, Chemistry in the Junior, Differential and Integral Calculus in the Senior. In other respects the two courses are identical.

COURSE OF STUDY IN PREPARATORY SCHOOL.

FIRST PREPARATORY

Fall Term.

- *5—ARITHMETIC—(Sadler's Commercial) to Longitude and Time.
- 5—GEOGRAPHY—(Appleton's Complete) commenced.
- 5— { GRAMMAR—To Syntax (Harvey.)
 { ORTHOGRAPHY—(Patterson's Speller).
- 5—HISTORY—History of United States (Eggleston) completed.
- 4—PENMANSHIP—(Appleton's Series).
- 3—GYMNASIUM.

Spring Term.

- 5—ARITHMETIC—(Sadler's Commercial) to Review of Interest.
- 5—GEOGRAPHY—(Appleton's Complete) completed.
- 5— { GRAMMAR—(Harvey) completed
 { ORTHOGRAPHY—(Patterson's Speller) completed.
- 5—HISTORY OF ENGLAND—(Thalheimer) completed.
- 5—PENMANSHIP—(Appleton's Series).
- 3—GYMNASIUM.

*The figures designate the number of recitations per week.

SECOND PREPARATORY**Fall Term.**

- 5—LATIN—Bellum Helvetium (Lowe and Butler) commenced.
- 5—ALGEBRA—(Wells' Higher Algebra) 100 pp.
- 4—ARITHMETIC—(Sadler's Commercial) to Alligation.
- 4—HISTORY—(Myers' Medieval) completed
- 4—PHYSICAL GEOGRAPHY—(Maury) completed.
- 3—GYMNASIUM.

Spring Term.

- 5—LATIN—Bellum Helvetium (Lowe and Butler) completed.
- 5—ALGEBRA—(Wells' Higher) to quadratics
- 4—ARITHMETIC—(Sadler's Commercial) completed.
- 4—HISTORY—(Myers' Modern) completed.
- 4—PHYSIOLOGY—(Martin's Human Body, Briefer Course) completed.
- 3—GYMNASIUM.

Those students who do not desire to prepare for the regular college course, can substitute for Latin or for any one of the studies of the Second Preparatory Year

- 5— { BOOK-KEEPING—(Sadler's Theoretical and Practical) Single and
Double Entry.
COMMERCIAL LAW—(J C. Bryant.

COLLEGE COURSE OF STUDY**FRESHMAN CLASS.****FALL TERM.****Classical Course.**

- 4—GREEK—Easy selections from Xenophon (Phillpotts & Jerram) to page 14. Daily translations into Greek, Goodwin's Grammar
- 4—LATIN—Caesar's Gallic War; Books II and III. Allen & Greenough's Grammar—Latin Composition
- 5—MATHEMATICS—(Wells' Higher) completed.
- 4—SCIENCE—Zoology Botany—(Packard's Briefer Course) for descriptive work, (Colton) as a guide in dissection, (Bissey's Botany Briefer Course), Lectures.

- 3—HISTORY—(Myers' Ancient) completed
 1—Elocution and Composition
 3—GYMNASIUM

Scientific Course.

Latin, Mathematics, Science, and History are the same as in the classical course. For Greek is substituted,

- 5—FRENCH—French Grammar (Edgren), Part First French Reader (Super), Part First.

SPRING TERM

Classical Course.

- 4—GREEK—Easy selections from Xenophon, to page 106. Daily translations into Greek. Goodwin's Grammar
 4—LATIN—Cæsar, Books IV and V Latin Composition.
 5—MATHEMATICS—Plane Geometry (Wells') completed.
 4—SCIENCE—Botany and Zoology Gray's New Lessons and Manual). Zoology (Packard) and (Colton), Lectures.
 3—ENGLISH—Rhetoric (Kellogg) completed.
 1—Elocution and Composition
 3—GYMNASIUM

Scientific Course.

Latin, Mathematics, Science and English are the same as in the classical course For Greek is substituted,

- 5—FRENCH—French Grammar (Edgren), Part II. to Syntax. French Reader (Super) completed Abbe Constantin completed.
 Six Declamations and Six Essays during the year in each course.

SOPHOMORE CLASS.

FALL TERM.

Classical Course.

- 4—GREEK—Xenophon's Anabasis (Goodwin) Book I Goodwin's Grammar Daily Exercises in translating into Greek.
 4—LATIN—Selections from 21st and 22nd Book of Livy Allen & Greenough's Grammar

- 5—MATHEMATICS—(Well's Geometry) completed. Plane Trigonometry (Well's' Essentials) completed.
- 5—SCIENCE Inorganic Chemistry (Remsen's Briefer Course) with Laboratory Work, Lectures.
- 5—ENGLISH—English Literature (Kellogg) completed, with Essay-writing
- 1—Elocution and Composition.
- 3—GYMNASIUM.

Latin, Mathematics, Science, and English are the same as in the classical course. For Greek is substituted,

- 5—FRENCH—*Athalie* and *Le Cid*, completed. Exercises from Edgren's French Grammar.

SPRING TERM

Classical Course.

- 4—GREEK—Xenophon's *Anabasis* Books II, III and IV completed. Daily Translations into Greek.
- 4—LATIN—Five Orations of Cicero.
- 5—MATHEMATICS—Spherical Trigonometry (Wells' Essentials), Surveying and Navigation (Robinson) completed, with Field-work.
- 5—SCIENCE—Inorganic Chemistry (Remsen's Briefer Course) with Laboratory work, (Noyes' Analytical Chemistry), Lectures.
- 3—ENGLISH—Trench on Words. Study of an English Classic.
- 1—Elocution and Composition.
- 3—GYMNASIUM.

Scientific Course.

Latin, Mathematics, Science, and English are the same as in the classical course. For Greek is substituted,

- 5—FRENCH—*Le Misanthrope*, *Le Roi des Montagnes*, Edgren's Grammar, Exercises completed. Lectures on French Literature.

Six Declamations and Six Essays during the year in each course.

JUNIOR CALSS.

FALL TERM.

Classical Course.

- 4—GREEK—Homer's *Iliad* (Seymour) Books I and II, completed. Reading at Sight. Jebb's Greek Literature.
- 4—LATIN—Virgil's *Aeneid*. Three Books completed.

- 4—GERMAN—Sheldon's Grammar William Tell, 1st Act. Daily Translations into German.
 4—MORAL PHILOSOPHY (Fowler's Principles of Ethics).
 5—MATHEMATICS—Analytical Geometry (Loomis) completed.
 1—Elocution and Composition.
 3—GYMNASIUM.

Scientific Course.

- Latin, German, Moral Philosophy and Mathematics are the same as in the classical course. For Greek is substituted,
 5—CHEMISTRY—Inorganic Chemistry with Laboratory work. (Remsen's advanced Course) Noyes' Analytical Chemistry), Lectures.

SPRING TERM.

Classical Course.

- 4—GREEK—Iliad—Books 3 to 6 (Seymour) completed. Reading at Sight Herodotus Jebb's Greek Literature.
 4—LATIN—Selections from Horace (Chase and Stuart).
 4—GERMAN--Wilhelm Tell, completed. Daily Translations into German.
 4—LOGIC—(McCosh) completed.
 4—ASTRONOMY—(Young).
 1—Elocution and Composition.
 3—GYMNASIUM.

Scientific Course.

- Latin, German, Logic, and Astronomy are the same as in the classical course For Greek is substituted.
 5—SCIENCE—Organic Chemistry (Remsen) Laboratory Work, Lectures.
 Six Declamations and Six Essays during the year in each course.

SENIOR CLASS.

FALL TERM.

Classical Course.

- 4—GREEK—Selections from Herodotus and Thucydides Apology and Crito (Seymour) completed Daily Reading at Sight. Jebb's Greek Literature.
 4—LATIN—Select Letters of Cicero (Chase and Stuart. Bender's Roman Literature.

- 4—GERMAN—Hermann and Dorothea completed. Maid of Orleans commenced Daily Lectures and Conversations in German.
- 4—POLITICAL ECONOMY—(Walker's briefer course).
- 5—SCIENCE—Physics (Dana's Mechanics). Lectures.
- 1—Elocution and Composition.
- 3—GYMNASIUM.

Scientific Course.

Latin, German, Political Economy, and Science are the same as in the classical course. For Greek is substituted,

5—DIFFERENTIAL CALCULUS—(Hardy).

SPRING TERM.

Classical.

- 4—GREEK—Medea and Three Philippics of Demosthenes, completed Daily Reading at Sight. Jebb's Greek Literature.
- 4—LATIN—Andria and Adelphi of Terence completed. Roman Literature [Bender].
- 4—GERMAN—Maid of Orleans and Minna Von Barnhelm, completed. Selections from Goethe's Prose (Hart). Lectures and Conversations in German.
- 4—PSYCHOLOGY—(James)
- 5—SCIENCE—Physics (Barker's Advanced Course). Lectures.
- 1—Elocution and Composition.
- 3—GYMNASIUM.

Scientific Course.

Latin, German, Psychology and Science are the same as in the classical course. For Greek is substituted,

- 5—INTEGRAL CALCULUS.—(Hardy).

Two Original Orations during the year, one in each term.

DEPARTMENTS OF INSTRUCTION.

GREEK — DR. REID.

GREEK commences with the Freshman Class, and extends over the four years of the college course, four recitations per week. The student commences to read, as soon as he has mastered the alphabet, Phillpott's Easy Selections from Xenophon, finishing it during the year and in connection with it studies Goodwin's Greek Grammar. In the Sophomore year he reads four books of the Anabasis and has daily exercises both orally and at the blackboard in translating into Greek. During the Junior year six books of Homer and parts of Herodotus are read. The Senior Class reads selections from Herodotus and Thucydides, the Apology, Crito, Medea, and three Philippics of Demosthenes, all of which are completed. Lectures are given during the Junior and Senior years upon Comparative Philology, Greek Mythology, Manners and Customs, and the History of Greek Literature and Greek Art, and almost daily practice is given in reading at Sight. Equivalents of the above authors may be read.

MENTAL, MORAL, and POLITICAL SCIENCE.

MORAL PHILOSOPHY — The Junior Class, during the Fall Term, recites four times a week on Fowler's Principles of Ethics. The topical method of recitation is exclusively employed.

LOGIC — In the Spring term the Junior Class, in four recitations per week, completes McCosh's Logic. Every effort is put forth to make this study as practical as possible, by requiring the students to work out the exercises in the appendix, and illustrations drawn from other sources. Great stress is laid upon the practical work as a most effective method of developing clearness of thought and accuracy of expression.

POLITICAL ECONOMY — Walker's briefer course is completed by the Seniors in four recitations per week, in the Fall Term. They are continually referred to articles on this subject in the books in the library and in the current reviews and magazines to be found in the reading-room. These articles they are required to read and a synopsis of them is given at the recitations.

MENTAL PHILOSOPHY The Seniors during the Spring Term complete James' Psychology briefer course, in four recitations per week. The students are encouraged by informal lectures and discussions to consult different authors and to think for themselves.

LATIN PROF MICOU.

The course in Latin extends over five years—from the beginning of the Second Preparatory to the end of the Senior

For the authors read and the amount of work required of each class, see preparatory and college courses of study.

During the first year the student acquires, by daily practice in translating from Latin into English and vice versa, an accurate knowledge of forms and simple syntactical constructions. During the other four years especial attention is given to turning English into Latin, the text read furnishing the words and constructions. This method is pursued from the conviction that translation from our own into a foreign tongue is not only the most direct but the only successful way of acquiring an accurate and scholarly knowledge of that tongue.

Throughout the entire course a careful comparison of Latin and English adds practical value to the disciplinary training belonging to the study of Latin.

MATHEMATICS PROF JONES.

The course of instruction in Mathematics extends through six years. Special attention is paid to Arithmetic in the Preparatory Department and the text-book used, to quote the words of the authors, 'embraces the whole field of modern business practice to the exclusion of every useless theory or obsolete subject.' Algebra is begun in the Second Preparatory year.

So far as text-book work is concerned, the usual Collegiate Course is pursued the next four years. As the object in the Freshman Class is to lay a firm foundation upon which to build the superstructure of the higher mathematics, considerable attention is paid, in Geometry to original exercises such work stimulates thought, and enables students to acquire facility in the use of language concise and at the same time logically accurate.

The Sophomore Class, besides completing Solid Geometry, and Plane and Spherical Trigonometry devotes about three months to Land Surveying. Class instruction is supplemented by field-work, and sufficient illustrations of methods of dividing land are given to enable any one with a good knowledge of mathematical principles to solve any case that is likely to arise.

The first term of the Junior year is devoted to Analytical Geometry the second, to Astronomy

Scientific students of the Senior Class are required to spend the entire year in Differential and Integral Calculus.

NATURAL SCIENCE PROF HUMPHREYS.

ZOOLOGY AND BOTANY alternate from day to day and continue together throughout the whole of the Freshman year. This method makes it comparatively easy to obtain suitable Zoological and Botanical material. The text-books are supplemented by numerous lectures though the greater part of the course consists in such practical work as the careful dissection, with description and detail drawings, of the leading types of animal life found on this peninsula, the microscopical study of the various forms of vegetation, and the analysis of flowering plants.

The Laboratory is open daily from 9 to 6.

Text-Books.

Packard's Zoology (briefer course) Colton's Practical Zoology
Bessey's Botany (briefer course) Gray's New Lessons and Manual.

CHEMISTRY occupies the whole of the Sophomore and Junior years, though only the scientific students have this study during the Junior year. The text-books, which are fully amplified and illustrated by daily lectures and numerous experiments, are used chiefly as guides. Each student is expected to perform accurately for himself many experiments and to take full and complete notes of his work. He is expected not only to know what happens, but as far as possible, why it happens. Both classes have constant access to the laboratory where they can work at any time under the supervision of an instructor

Text-Books.

Sophomore Year.—Remsen's Inorganic Chemistry (briefer course)
Noyes' Qualitative Chemistry

Junior Year.—Remsen's Inorganic Chemistry (advanced course),
Noyes' Qualitative Chemistry Remsen's Organic Chemistry

PHYSICS occupies both terms of the Senior year. The text-books are amplified and illustrated by daily lectures and such experiments as the apparatus will admit of. Special attention is given in class to the mathematical part of the subject. The students are also expected to do as much practical work as possible in the laboratory, which is constantly open to them.

Text-Books.

Dana's Elementary Mechanics Barker's Physics (advanced course).

ENGLISH PROF CLARKE.

ENGLISH GRAMMAR. The students receive close and constant drill in grammatical forms and syntactical construction. Special attention is paid to the study of the sentence as the unit of language, thereby enabling the young student to gain a correct understanding of the relation of words.

RHETORIC. The plan pursued is a practical one. Composition is constantly employed as the means to illustrate the rules of the text-book.

ENGLISH LITERATURE. The text-book is simply used to introduce the student to the author and his works, to teach the growth of the literature, and to present the historical phase of it. A true appreciation of the genius of the language is sought from a careful study, as far as possible, of the productions themselves.

HISTORY The whole domain of history is traversed, and, by lectures and questioning, the main facts are impressed upon the student. Historical maps are used in the presentation of this study

ELOCUTION This department has been vastly augmented within the past two years. The aim is to cultivate the student in the art of expression by stimulating the feelings, thereby making the work less mechanical and imitative. Thorough training, as far as time will allow, is given in voice cultivation.

MODERN LANGUAGES BERTHA M. STILES.

GERMAN There are four recitations per week in German, extending through the Junior and Senior Years. The class begins immediately to read William Tell, and, in connection with it, studies Sheldon's Gram-

mar. Tell is completed during the Junior year. The student is required daily, both orally and at the blackboard, to translate into German. During the Senior year Hermann and Dorothea, Maid of Orleans. Minna Von Barnhelm are read and selections from Goethe's Prose. Daily lectures and conversation in German form an important part of the class-work of the second year. It is believed that, by laying great stress upon speaking German, not only is a more thorough knowledge of the Grammar obtained, but also more pages of German can be read than in any other way in the given time.

FRENCH. The French classes meet five times a week throughout the Freshman and Sophomore years. This course is designed to enable the student to read French fluently and to give him some acquaintance with the history of French Literature.

THE PREPARATORY COURSE.

The Preparatory Course extends over two full years. It is designed, not only to prepare students for college, but to give a thorough English education. Applicants for this course should have finished at least the first year of the sixth grade in the public schools, or to the end of fractions in arithmetic, with a corresponding knowledge of other studies. All the professors of the college have one or more classes in this department. The student thus receives, at the time he needs it most, the advantage of experienced instructors. Three-quarters of an hour is given to each recitation. This course is recommended to those who desire to fit themselves for teachers in the public schools.

BOOK-KEEPING.—The attention of those desiring to prepare themselves for business is called to the course in Book-keeping, extending over one year with four recitations per week. Sadler's Theoretical and Practical Book-keeping is used as the text-book. Any one who has completed the work of the First Preparatory year may enter this class. The instructor having taken a course in a Business College, employs the latest and most approved methods. The student's mind is not permitted to become confused by theories that will be of no possible use to him in after life, but is constantly directed to the learning of Practical Book-keeping.

SPECIAL OR PARTIAL COURSE.

Those who do not desire to take a complete course may select such studies, with the consent of their parents or guardians and the approval of

the faculty as they may prefer. They must take at least fifteen recitations per week. Their tuition is the same as in the regular classes. They rank as students of that department to which the majority of their studies belongs. Certificates of proficiency are given to such as have completed satisfactorily a special course.

ADMISSION OF LADIES.

By a resolution of the Board of Visitors and Governors of September, 1891, ladies are admitted to the College and Preparatory School on the same conditions as gentlemen. Twenty have been in attendance during the past year. A suitable house within 8 minutes' walk of the college has been procured for those coming from a distance, where board, including room and fuel, can be furnished from \$3 to \$3.50 per week. The building will afford comfortable accommodations for 12 or 15 persons. They will be under the immediate supervision of the lady teacher who will board with them.

THE SESSION

The session is divided into two terms :

- 1st. From the third Wednesday of September to the 7th of February including the intermediate examination.
- 2d. From the 8th of February to the third Wednesday in June, including the final examination and commencement.

THE HOLIDAYS.

There is a holiday of two weeks at Christmas, extending from December 24th to January 4th, inclusive one of a week at Easter, commencing on the Wednesday preceding Good Friday, one on Thanksgiving Day and one on Washington's Birthday

EXAMINATIONS AND REPORTS.

There are two general examinations, intermediate and final, each extending through eight days at the close of the Fall and Spring term.

Reports are sent to the parent or guardian at the close of every month, in which the average of the student in each study and his de-

merits are recorded, and one at the close of the term, giving his general monthly average and his examination mark in each subject. In order to pass from any class to the next higher, a student must each term make seventy out of a possible hundred in every study. This final average is obtained by dividing by two the sum of his general monthly average and examination average. A student not making the mark necessary to pass is conditioned by the professors—that is, is assigned work which it is necessary for him to complete before he is allowed to proceed with his class.

A Freshman failing on more than three subjects, a Sophomore on more than two, or a Junior on more than one, is not allowed to enter the next higher class.

Demerits are given for absence from recitations and for misconduct. Any student receiving too during one term is suspended from the college for two weeks. A second suspension, whenever occurring, is for one month. A third, with the approval of the Board of Visitors, removes the student permanently from the college.

DISTINCTIONS AND DEGREES.

The student of the graduating class obtaining the highest average in all the studies of the four college years, delivers the Salutatory address. The one obtaining the second highest delivers the Valedictory.

The degree of BACHELOR OF ARTS is conferred by the Board of Visitors and Governors upon those who have satisfactorily completed all the studies of the classical or scientific course.

Any student having made a general average of 95 or over for recitations and examinations during the four years of his college course, is graduated MAXIMA CUM LAUDE; one making an average of over 90 is graduated MAGNA CUM LAUDE, and one making over 80, CUM LAUDE. This honor is recorded on the diploma.

The degree of Master of Arts is conferred upon any graduate who has entered upon any of the learned professions, or who has completed a post graduate course of study assigned or approved by the faculty of the college.

Those students who make a general average during the year in recitations and examinations of 80 or over, are entitled to honorable mention on Commencement Day.

ORATIONS, DECLAMATIONS, AND COMPOSITIONS.

The Seniors are required during the year, in addition to the Commencement addresses, to write two orations and deliver them before the students and invited guests in the college chapel.

Each member of the college classes is required, three times each term, to write an essay and to declaim before the whole body of students. These two exercises combined count as one study in estimating his class standing.

STUDY HOURS AND INSPECTION OF DORMITORIES.

Study hours extend from seven to ten P. M., at which time all students, except the Seniors, are required to be in their rooms. Inspections of the dormitories are made each evening.

LIBRARY AND READING ROOM.

The college has a well-selected library supplied with valuable works relating to History, Biography Science, Voyages, Travels, Criticism, Poetry, Fine Arts, and General Literature, for the accommodation of the Board of Visitors and the students and officers of the college, who are allowed to take books from the library, subject to certain rules prescribed by the Faculty.

The Library and Reading Room are open on Wednesday from 2 to 4 P. M., and on Saturday from 10 A. M. to 12 M. The following magazines are furnished for the accommodation of students and teachers.

THE NATION, HARPER'S, CENTURY ATLANTIC, ECLECTIC, FORUM, NORTH AMERICAN REVIEW POPULAR SCIENCE MONTHLY SAINT NICHOLAS, SCIENTIFIC AMERICAN EDUCATIONAL REVIEW SCHOOL REVIEW, REVIEW OF REVIEWS, YOUTH'S COMPANION, NEW ENGLAND JOURNAL OF EDUCATION, FLIEGENDE BLÄTTER, and SCRIBNER.

PRIZES.

Mr A. H. Reid, of Philadelphia, gives a prize of Fifteen Dollars to that student of the college delivering the best declamation, and one of Ten Dollars to the student delivering the second best declamation. The contest takes place during the commencement week.

C. T. Westcott, Esq., of Chestertown, gives a prize of Twenty-five Dollars to the most meritorious member of the Senior class.

A Gold Medal is awarded at Commencement by the Board of Visitors and Governors to the most meritorious student of the Junior class

Mr. T. W. Eliason, of Chestertown, gives a prize of Twenty Dollars to the member of the Sophomore class, making the highest average in recitations and examinations during the year.

R. D. Hynson, Esq., of Chestertown, gives a prize of Twenty Dollars to the most meritorious student of the Freshman class.

H. W. Vickers, Esq., of Chestertown, gives a prize of Twenty Dollars to the student of the Second Preparatory class, making the highest average in all studies necessary to enter the Freshman class.

These prizes will be awarded on Commencement day.

EQUIPMENT OF SCIENTIFIC DEPARTMENT

The college is furnished with suitable apparatus for the mathematical course, and for illustrations and experiments in science.

The laboratory consists of three rooms, one of which is furnished with suitable desks and drawers for eighteen students in Zoology and Botany, another with desks and drawers for ten students in Practical Physics, and the third with desks, drawers and shelves for twenty one students in Chemistry.

The equipment of this department is being added to from time to time, and is used to its fullest extent.

MOUNT VERNON SOCIETY

This Literary and Debating Association, formed by the students, holds its sessions every Saturday evening in West Hall. The Annual Address, before this Society in the Town Hall on the evening preceding the commencement, was given last year by Prof. L. Irving Handy of Newark, Delaware.

PHILOMATHEAN SOCIETY

This society was organized in 1891 by students of the college. It meets every Saturday evening in Middle Hall. The Annual Address was delivered last year by the Rev. J. D. C. Hanna, of Wilmington, Del.

PIERIA.

This literary society was organized by the young ladies of the college in the spring of 1894. Its meetings are held twice a month in the chapel. The exercises consist of essays, recitations, debates, and a paper.

PUBLIC WORSHIP

College exercises are opened every morning with reading of the Scriptures and prayer, at which every student, unless excused on account of religious scruples, is required to be present.

Every student boarding at the college, is required to attend public worship on Sunday morning, at such church as may be designated by the parent or guardian.

THE YOUNG MEN'S CHRISTIAN ASSOCIATION.

The Young Men's Christian Association numbers at present thirty members. It meets every Sunday afternoon at half-past four. The Annual Sermon was delivered last year by Rev B. A. Dumm, of Kent Island. The officers of the association are :

A. F. CAREY President.
 R. MERRIKEN, Vice-President.
 W L GORDY, Treasurer
 G. E WILLIAMSON, Recording Secretary.
 A H. COVEY, Corresponding Secretary

ALUMNI ASSOCIATION

This Association was reorganized in June, 1887, and since that time has held annual reunions and banquets. Its object is the advancement of the interests of Washington College. Each year it is proposed to have an address by some member. The Alumni exercises are an interesting feature of each commencement. The officers are :

H. W VICKERS, Esq., Chestertown, Md., President
 COLIN F STAM, '63, Chestertown, Md.,
 THOMAS CURRY, '73, GREENWOOD, Del.; } Vice-Presidents.
 JOHN MACE, M. D., '83, Cambridge, Md.; }
 PROF. J S. WILLIAM JONES, '89, Chestertown, Md. Cor. Sec'y.
 Fred, G. USILTON, Chestertown, Md. Recording Secretary
 DR H L DODD, '85, Chestertown, Md., Treasurer

TUITION

The rates of tuition are

College Classes, per term.....	\$25 00
Preparatory Department, per term.....	20 00
Special Course, College Classes, per term.....	25 00
Special Course, Preparatory Department.....	20 00

The tuition must be paid at the beginning of each term. No portion of this fee is refunded on account of withdrawal before the close of the session, unless it be rendered necessary by ill health,

BOARD, ROOM-RENT, AND FUEL.

All students from a distance are expected to live in the college buildings, unless special arrangements are made with the Principal. The rent of rooms varies from \$3 to \$10 per year. Every boarder supplies his own furniture. This can be disposed of at reasonable rates when the student leaves the institution. Fuel is furnished for these rooms at \$4 per year for each occupant.

Good, substantial board is supplied at \$3.00 per week. Those students who come on Monday and return home on Friday at noon, are charged \$2.00 per week.

All day-students are charged one dollar per term for fuel to heat the recitation-rooms and for janitor's services.

No student will be permitted to change his boarding place during the term.

The following is an accurate estimate of expenses in the regular boarding department for the year of thirty-six weeks, exclusive of the cost of text-books :

Board, \$3 per week... ..	\$108 00	\$108 00
Room Rent.....	3 00 to	10 00
Fuel.....	4 00	4 00
Janitor's Services and Care of Dormitories.....	3 00	3 00
Tuition.....	40 00 to	50 00
Washing 6oc. to \$1 per month.....	5 70 to	9 50
Total Expenses from.....	\$163 70 to \$184 50	

CO-OPERATIVE BOARDING.

A Co-operative Boarding Club was organized in the fall of '91 in connection with the college. It is under the immediate supervision of the Principal. The affairs of the club are managed by a student, who acts as commissary, making all purchases, collecting assessments and paying bills. He receives his board for his services.

At the close of each month an inventory is taken, accounts settled and the expenses divided among the members. An auditing committee is appointed each month, whose duty is to examine the books of the commissary and make a report to the club.

Each member must advance \$8.00 at the commencement of each month, and at its close must pay the balance due, if any, as no deficit is allowed to run into the following month.

The board will vary but little, depending on the cost of provisions, from \$2.00 per week, or \$72.00 for the college year

The total expenses for students in the club will then be :

Board, 36 weeks.....	\$72 00	72 00
Room Rent.....	3 00	10 00
Fuel.....	4 00	4 00
Janitor and Care of Dormitories.....	3 00	3 00
Tuition.....	40 00	to 50 00
Washing 6oc. to \$1.00 per month.....	5 40	to 9 00

Total expenses will vary from.....\$127 40 to \$148 00

Twenty-six students were members during the past year. The board, owing to the higher cost of provisions, averaged \$2.24, varying from \$2 54 to \$1 92 per week.

A charge of \$1.00 per week will be made on the club to keep the kitchen and dining-room furniture in good order.

FURNISHED ROOMS.

As in all probability there will be more students in attendance next year than the college dormitories will accommodate, arrangements will be made to supply furnished rooms in the town at reasonable rates to those who cannot find lodgings in the college buildings. Such students can obtain table board either at the regular boarding department of the college or at the club.

ATHLETIC ASSOCIATION.

This organization, although in existence but six years, has grown into one of the most attractive features of the college. Wonderful advance has been made in the line of athletics. The friendly competition between Washington College and sister State institutions has resulted in many a hard fought battle on foot-ball and base-ball fields. While athletics are encouraged by the faculty muscular development is not allowed to interfere with mental improvement. A careful oversight is taken of the workings of the Athletic Association, although it is officered entirely by the students. No contests are allowed to interrupt the regular work of the curriculum. During the present year, the base-ball team has achieved remarkable success on the diamond. Under the efficient management of the gymnastic instructor a most entertaining exhibition was given on the college grounds during commencement week.

The officers of the Athletic Association are :

W L GORDY President.
E. G WILLIAMSON, Vice-President.
R. MERRIKEN, Recording Secretary
H. N PERKINS, Corresponding Secretary.
T MASSEY Treasurer.

GYMNASIUM.

By the liberality of the citizens of Chestertown, a gymnasium has been erected on the campus at a cost of \$1200. This has been furnished with apparatus by the Board of Visitors and Governors at an expense of \$500. Physical culture is made an essential part of the college course. Regular exercises, under the personal supervision of a competent instructor, are given three hours per week to each College and Preparatory class.

STATE STUDENTS

By an agreement made with the State, two students from each county on the Eastern Shore are received free of all charge for board, room-rent, tuition and text-books, but are required to furnish their own rooms and fuel.

It is desirable that all applicants should have completed the requirements for admission to the Freshman class, as given on page 11 of the Catalogue. No State student will be allowed to enter below the Second Preparatory class.

One scholarship will be vacant June 20 from Somerset County

List of Graduates of Washington College, as far as they can be Learned.

Any information concerning alumni whose names are not found in
this list will be thankfully received.
